

# HUCK

SUSTAINABILITY THAT CONNECTS.

OUR ROPE  
FOR A BETTER  
FUTURE.

EXPERIENCE YOUR ADVENTURE.

## OUR ROPE CARRIES HISTORY.

Every single rope is made from 100% post-consumer materials, such as recycled PET bottles that were once part of everyday life. Through innovative processing techniques, we transform these used materials into a strong, durable rope – completely free of adhesives or binding agents. In this way, what could have been waste is transformed into something new that enriches playgrounds and builds bridges while supporting the circular economy.

Each rope tells a story of reuse and responsibility, with a clear message: Sustainability can be strong and forward-thinking.

„Safety for the little ones,  
responsibility for the big ones:  
Our sustainable rope connects  
generations and protects  
tomorrow’s world.“

## TECHNICAL SPECIFICATIONS

**Material:**

**100% recycled polyester**

**Diameter:**

**16 mm**

**Color:**

**Black**

### Sustainability:

- ✓ 100% post-consumer material
- ✓ Free of adhesives
- ✓ Free of waterproofing agents
- ✓ Environmentally friendly and safe

### Safety & Quality:

✓ The same strength as conventional ropes.

And we go one step further – at the end of its life cycle, our rope can be recycled and returned to the circular economy.

The result is a product that not only impresses today, but also conserves resources for tomorrow.

### Your contribution to the environment:

As a customer, every purchase you make directly contributes to the circular economy.
